

deco

This series represents continued development, combining innovative technology, functionality and exceptionally beautiful design. Responding to a desire to make the unique more affordable, these glasses, which were before only exclusively handcrafted, are now available machine-made. Apart from high aesthetic demands, a major consideration has been suitability for daily use by the catering industry. We have created an exclusive glass-product that is both durable and attractive. The glasses are made from high quality lead-free crystal glass, stem and base formed in one process, as in the hand-made version. Entirely handcrafted versions of this series are also available, as ever, in first-grade quality.
